Faith and Science –

5/3

S Scripture
O Observation
A Application
P Prayer

- What's one idea from the message that stood out to you? Why do you think it grabbed you?
- What do you believe science's role to be in our lives?
- What are some of the arguments you have heard people present for science disproving faith? What has your response been to those arguments?
- Read Genesis 1:1, Nehemiah 9:6, Hebrews 11:3, Colossians 1:15-17, and John 1:3.
- Does it impact your faith if the earth wasn't created in 6 days, as detailed in Genesis? Why or why not?
- What does it mean for all things to be created through and for Christ, as detailed in the Colossians passage?
- Is there anything that science could present or teach that would cause you to struggle with your faith? Why or why not?
- What do feel is the best way for you to interact with people who believe science disproves faith?

Prayer: Pray that we will be able to interact with science properly in light of our faith.
